# Environmental Policy

## 1. Policy statement

Sunrise Rentals Ltd is committed to minimising the environmental impact of its plant hire, transport and waste processing operations, to preventing pollution, and to full compliance with environmental legislation including the Environmental Protection Act 1990 and the Waste (England and Wales) Regulations 2011. Through our waste material processing services we play an active part in the circular economy, and we aim to divert at least 90% of the construction and demolition waste we process from landfill.

## 2. Waste processing and duty of care

- Construction & Demolition (C&D) waste is screened and crushed into reusable aggregates, cutting landfill dependency and primary aggregate demand.
- Commercial & Industrial (C&I) streams are sorted and segregated to maximise recovery rates.
- Municipal Solid Waste (MSW) is processed through screening and separation to divert material from landfill.
- Waste carrier licences, permits and duty-of-care documentation are maintained and available for inspection at all times.

## 3. Emissions, fuel and transport

- Stage V emission-compliant machinery is prioritised across the fleet, and all plant is maintained to minimise exhaust emissions.
- An anti-idling expectation applies across our operations, and low-loader movements are route-planned to reduce road miles.
- Fuel bowser and tank operations are managed with bunded storage, drip trays and spill kits as standard.

## 4. Protecting land, water and neighbours

Refuelling procedures are designed to prevent ground and water contamination, silt management protects watercourses near our works, and emergency spill kits are carried on plant and held at operating locations. Noise and vibration are assessed for work near residential areas, with working hours agreed with local authorities where required.

## 5. Continual improvement

---

We monitor fuel use, waste volumes and recovery rates, set ourselves improvement objectives, and review this policy annually. Every employee receives environmental awareness training appropriate to their role, including spill response and waste segregation.
